Education

BS Computer Science COMSATS University
09/2021 - Present

Major Courses

- -Operating System
- -Objected Oriented Programming
- -Data Structure and Algorithm
- -Machine Learning
- -Database System
- -Software Engineering
- -Web Development
- -PPIT

Skills

Java Script | React Js | Framer Motion | Tailwind CSS | REST APIs | Mongo DB | Django | Flask | Git/GitHub

Work Experience

Toolkit Website

March 07, 2024 - Present
Ibn e Adam Ltd.

- Currently developing a Toolkit website using Django.
- Creating a platform that offers various tools and resources for users.
- Emphasizes backend development and database management, highlighting skills in Python and Django.

Self Learning Project

Currency Converter:

- Developed a currency converter using HTML, CSS, and JavaScript. Implemented features to convert between various currencies with real-time exchange rates and a user-friendly interface.

UNDERGRADUATE PROJECTS

Python Programming:

Self Learning

- Developed multiple REST APIs using Django and PostgreSQL for storing data
- Still learning ML and AI concepts.
- Developed and studied some ML models and deployed them using Django for serving models and React/Next.js for the user interface

Email Spam Detection System

January 2024

- Developed an email spam detection system using Django and React.js.
- Utilized machine learning algorithms including classification, random forest, logistic regression, and decision tree for email classification and spam detection.
- Implemented a user-friendly interface for users to classify emails and trained the system for improved accuracy over time.
