## Education

BS Computer Science COMSATS University  
09/2021 - Present

Major Courses

-Operating System

-Data Structure and  
Algorithm

-Database System

-Web Development

-Objected Oriented  
Programming

-Machine Learning

-Software Engineering

-PPIT

## Skills

Next Js

React Js

Mongo DB

HTML

CSS

Java Script

Node.js

Express.js

Git/GitHub

## Work Experience

### Full-Stack Developer

January 07, 2023 - June 07, 2023  
Ibn e Adam Ltd.

#### E-Commerce Platform Clone:

- Built a fully functional e-commerce platform clone using Next.js.
- Incorporated features such as product listing, shopping cart, and user authentication.

### Self Learning Project

#### Currency Converter:

Developed a currency converter using HTML, CSS, and JavaScript. Implemented features

- to convert between various currencies with real-time exchange rates and a user-friendly interface.

## UNDERGRADUATE PROJECTS

### To-Do List Application: Self Learning

- Developed a to-do list application using HTML, CSS, and JavaScript.
- Implemented features such as adding, editing, and deleting tasks with a clean and intuitive user interface.

### Email Spam Detection System January 2024

- Developed an email spam detection system using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Utilized machine learning algorithms for email classification and spam detection.
- Implemented a user-friendly interface for users to classify emails and trained the system for improved accuracy over time.
